Re: Roger Thomas House Transport

Kim,

Just a note to convey my appreciation for the work you did transporting Mr. Thomas's Historic home from Sewall's Point to Flagler Drive. As an environmental permitting consultant I work extensively with marine contractors around environmentally sensitive areas. Building consensus with governmental agencies can be difficult when there are so many instances of environmental damage due to poor project management. This project was under heavy scrutiny by the DEP and Army Corps for just that reason. After the project was completed I can say without reservation that agency staff were quite impressed with your creative ability to engineer the project and comply with all permit conditions. Your company has definitely reassured permitting agencies that these barge transport projects can be accomplished around environmentally sensitive areas with little or no impact. I know that staff at the DEP have high regard for projects bearing your name and have the highest assurance that projects will be implemented in accordance with the permit.

It was a pleasure working with you on this project and I would only recommend your company for any future barge projects I may encounter.

Sincerely,

A handwritten signature in black ink, appearing to read 'Bruce Jerner', written over a circular stamp or seal.
